## TECHNICAL DATASHEET

# Kärcher HDS 895

### Description

The Kärcher HDS 895 is a professional hot-water high-pressure cleaner equipped with an integrated burner system for efficient heating performance. It supports hot-water operation up to approximately 98°C and features a dedicated steam mode reaching up to 155°C. Depending on the specific model variant, the unit offers a wide pressure and flow range suitable for demanding industrial cleaning tasks. In steam mode, the pressure is automatically reduced to a maximum of 32 bar to ensure safe operation.

### Technical Specifications

Parameter	Value
Device Type	Hot-water high-pressure cleaner (steam-capable)
Model	Kärcher HDS 895
Power Supply	400 V, 3-phase
Operating Pressure	approx. 30–180 bar (variant-dependent)
Steam Mode Pressure	max. 32 bar
Flow Rate	approx. 400–1000 l/h (variant-dependent)
Hot-Water Temperature	up to approx. 98°C
Steam Temperature	up to approx. 155°C
Burner Type	Diesel / heating oil (variant-dependent)
Application	Industrial cleaning, workshops, machinery, vehicles
Condition	Used (unless specified otherwise)

### Features

- High-performance burner system for hot water and steam
- Steam mode up to 155°C for deep cleaning
- Wide pressure and flow range depending on model variant
- Robust industrial-grade pump and components
- Suitable for continuous professional use
- Safety pressure reduction in steam mode

## IBA-Retzer GbR

Machines & Industrial Assets  
Regensburger Str. 31  
93092 Barbing  
info@iba-retzer.com  
Telefon: +49 151 285 99 495

### **Applications**

- Industrial cleaning and maintenance
- Vehicle and machinery washing
- Workshop and service environments
- Agriculture and construction
- Deep cleaning with steam mode

### **Notes**

The detailed technical datasheet is available as a PDF under the photos. IBA can arrange transport upon request. Transport costs are the responsibility of the buyer and will be added on top of the listed sales price.
